

The "Politecnico di Milano, one of the best universities in the world, is where I took the bachelor Degree in Industrial Design. Thanks to the Master Degree in Fashion Accessories I have the Know-How about Materials and production technologies in fact all my products take each field: Aesthetics, functional and efficiency. I know I have excellent skills in design Sportswear, I'm spending years working for Italian companies in the Cheerleading field. I'm an Athlete of the "TEAM ITALY" National team 2016-17, so I use to test my products on PRO Athletes to understand better every need. I know how to manage every problem and I'm absolutely a Team Builder. During my career I developed a huge passion for Graphic and Web Design thanks also to my 3D modeling skills. In a few years I design Logos and T-shirt Artwork for best Cheerleading Teams in Europe. Today I'm looking for a career in the SPORT WEAR field that I love, to travel, learn and working to develop my experience.
